Coding, Hiking, Dogs, Mountaineering

PROFILE

I am starting a new chapter in my life as a web developer and hope you will take this journey with me. I recently finished an intensive full-stack program at Rutgers University where I obtained vast understanding of client and server side languages such as JavaScript, HTML, and MySql just to name a few. I love being creative and focusing on projects that will increase my knowledge base. In addition, I enjoy working in a team environment since it enables knowledge sharing and learning from others. However, I am also able to work independently.

EXPERIENCE

Freelance Software Developer

Self-employed | Parkesburg, PA | August 2018 - Present

- Developing,optimizing and maintaining websites and applications utilizing HTML, CSS, PHP, MySQL, Javascript , JQuery and various APIs to meet the goals of the client.
- Created an Administrative backend so that clients can quickly update customer data by using Javascript and Ajax.
- Migrating existing websites/applications to a stable, high-performance, maintainable platform via React.

Medicaid Billing Rep

Conifer Health Solutions | Exton,PA | November 2016 - March 2018

- Worked an estimated 1,200 accounts per week with great attention to detail.
- Used a wide range of Medicaid billing tools to resolve a wide range of insurance denials.
- I produced $150,000.00 per month in company revenue.

Customer Support Rep

Conifer Health Solutions | Exton,PA | January 2013 - October 2016

- Used broad knowledge of medical terminology, CPT coding and ICD-9 to resolve account balances.
- Utilized research and investigative skills to obtain patient information.
- Investigate and resolve denied claims from insurance explanation of benefits.
- Communicating with patients so they can better understand their balance due.
